Aspiring Cloud Engineer

CAREER OBJECTIVE

Aspiring Cloud and IT professional with a strong foundation in AWS, networking, and system fundamentals. Skilled in Linux, Git, and basic CI/CD concepts, with knowledge of software testing and troubleshooting. Quick learner with strong problem-solving abilities and a passion for building scalable and efficient solutions. Seeking opportunities in cloud and technical roles to apply and grow my skills.

EDUCATION

Master of Computer Applications (MCA)

Sb jain institute of technology management and research | 2025 – 2027 | 1st Year [SGPA: 8.23]

Bachelor of Computer Applications (BCA)

St.francis de sales college | 2022 – 2025 |

TECHNICAL SKILLS

Cloud Platform: AWS (EC2, S3, IAM, Lambda basics, CloudWatch, Route 53, CloudFront)

DevOps & CI/CD: GitHub Actions, Git, GitHub, CI/CD Pipelines, YAML

Programming: Python , Bash/Shell Scripting Basics, SQL

Web Technologies: HTML, CSS, JavaScript

Operating Systems: Linux (Ubuntu), Windows

Tools: VS Code, Postman, draw.io, GitHub Secrets management

Networking: DNS, HTTP/S, IP addressing, CDN, Load Balancing concepts

Currently Learning: Docker, Terraform, AWS Solutions Architect Associate (SAA-C03)

PROJECTS

Static Website Hosting on AWS S3

Tech Stack: AWS S3, CloudFront, Route 53, IAM

- Hosted a static website on AWS S3 with static website hosting enabled and public access via bucket policy.
- Configured AWS CloudFront CDN for HTTPS delivery and reduced page load latency.
- Set up Route 53 custom domain with A-record alias pointing to the CloudFront distribution.
- Applied IAM bucket policies following least-privilege principles to restrict unauthorized access.
- Outcome: Fully live website accessible via custom domain with CDN-optimized performance.

Automated CI/CD Pipeline using GitHub Actions

Tech Stack: GitHub Actions, AWS S3, Python, YAML, Git

- Built a CI/CD pipeline using GitHub Actions to automate build and deployment on every code push.

- Configured YAML workflow files to auto-deploy to AWS S3 on push to the main branch.
- Added a linting and validation stage to check code quality before deployment runs.
- Stored AWS credentials securely using GitHub Secrets — no hardcoded keys in codebase.
- Outcome: Eliminated manual deployment; code pushed to GitHub auto-deploys in under 60 seconds.

CERTIFICATIONS & COURSES

Python programming — Udemy / YouTube | 2025 | Completed

AWS fundamentals — simplilearn | 2026 | Completed

ACHIEVEMENTS & ACTIVITIES

- Deployed 2 personal AWS cloud projects independently using AWS Free Tier — self-driven beyond coursework.
- Actively learning Docker and Terraform to expand DevOps skill set.
- Participated in college technical events / seminars related to cloud and emerging technologies.

LANGUAGES

English (Professional) | Hindi (Native) | Marathi (Native)
